## TAXUS (Yew Tree)

The Yew tree is an ornamental woody plant, grown for its dark green foliage. They are desirable for park plantings, foundation plantings, well suited for hedges and easily trimmed into any desired shape. They are much used for fantastic topiary work. The wood of the Yew is heavy, hard and of reddish color. Because of the slow rate of growth it takes years to develop a plant for the market; thus, the heav-

# Prices for Balling and Burlapping

Prices listed as follows are for regular nursery practice and in accordance with the variety of material, root system, etc.

			Each
10	inch	diameter	 1.00
12	inch	diameter	 1.25
15	inch	${\bf diameter}$	 1.75
18	inch	diameter	 3.00
20	inch	diameter	 3.75
22	inch	diameter	 5.00
24	inch	diameter	 6.50
28	inch	diameter	 8.75
32	inch	diameter	 11.00
36	inch	diameter	 16.50
42	inch	diameter	 19.50
48	inch	diameter	 23.00
54	inch	${\bf diameter}$	 32.50
60	inch	diameter	 37.50
66	inch	diameter	 45.00
72	inch	diameter	 55.00

For client to determine his base cost per ball, use the following example:

```
1" caliper of tree = 12" diameter price.
```

1½" caliper of tree = 18" diameter price.

2" caliper of tree = 24" diameter price.

We reserve the right to keep the balled trees and shrubs at a minimum or maximum size without change in the ball cost.

# Why You Get the Best-

# When You Buy From Us!

Our trees, shrubs, evergreens, etc, are grown for high-class landscape work in order to give an immediate effect when set out.

Our plants are grown in fertile soil and well-spaced in rows. All our nursery stock is well fertilized periodically in order to get the best color in the plants and at the same time keep them in the healthiest condition.

Our plants are given individual attention in the proper shearing so as to put them in the best possible balanced symmetrical shape and to give them the most compact bodies possible.

Our nursery stock is many times transplanted giving it the chance to develop the fine, fibrous root system so necessarily needed to move these plants with ease and safety.

Weeds are constantly being eliminated and the ground kept moist by constant cultivation by horse, by machinery and by hand hoeing.

Spraying is done, when needed, to rid the plants of any insect pests.

Therefore, we take great pride in saying that we grow some of the best specimen stock to be found anywhere in this section of the country.

When you are in the vicinity drop in at our Nurseries and let us show you our nursery stock.
